INT 16H 02H: Query Keyboard Shift Status

                                          [XT] [AT]

Expects: AH   02H

        ��

Returns: AL   [KbdShiftFlagsRec](#) (status of Ctl, Alt, etc.)

        ��

   Info: Returns the current status of the shift keys. This is the same

        as the byte at 0040:0017 in the [BIOS Data Area](#).

  Notes: ◆ Additional shift-key information is available via [INT 16H 12H](#)

          for systems equipped with 101-key BIOSes.

        ◆ There is no corresponding fn to set the keyboard shift status.
